

Maxx Air is the Heartbeat of Every High Performing Shop

Maxx Air is Coats' portfolio of energy efficient compressors and services for automotive aftermarket repair facilities. Our full-line of vertical, horizontal, and duplex compressors focuses where other providers don't—on the unique needs of vehicle repair operations.

Backed by the Coats Service Network you know and trust.

Standard

Designed and built in the USA, Maxx Air Standard is the entry point in the lineup. Like all Maxx compressors, Standard includes our low RPM pumps that provide exceptional service and longevity, with motors built for a service life of over 20,000 hours.

Advanced

Your techs are focused on revenue-producing activities, so it's easy for critical compressor maintenance tasks to get overlooked. Maxx Air Advanced incorporates around the clock automated maintenance and fail-safes that add an extra layer of protection to your compressor, keeping you up and running with less oversight and unplanned downtime.

Complete

Maxx Air Complete delivers total performance—delivering cooler, drier air that protects your compressor and every system in your shop that relies on it.

Maxx Air Compressors are designed for easy maintenance and servicability.

Planned Maintenance. Zero Surprises.

2 Year Agreement

5 Year Agreement

Preventive maintenance at six-month intervals keeps your compressor operating at peak condition and protects against unplanned downtime. Plus, when you add a Coats preventive maintenance agreement to your Advanced or Complete Maxx Air compressor, your warranty is **doubled** from 1 year to 2 years parts and labor.

All service is done by the Coats Connect Service Network – the same team that supports your other Coats technologies.

Preventative Maintenance Plans includes:

- ✓ Filter and Oil Changes
- ✓ Cleaning
- ✓ Valve and leak checks
- ✓ Infrared Scanning for hidden wear and damage
- ✓ 35+ points of inspection on motor, pump, and tank

20,000+ Hours
Motor Service Life

Serviceability

Maxx Air is supported by Coats Connect, the industry's only service network staffed coast to coast by our own factory-trained techs and product support pros backed by a central dispatch system that manages every service call, start to finish.

We offer unmatched OEM parts that are designed and manufactured to be dropped in or swapped out in less time with less complexity, meeting the exact specifications of Maxx Air Compressors to ensure integrity and accelerate the pace and quality of repairs.

Everything we do is delivered with the authentic Coats Attitude.

The Coats Attitude is a success maker -- grit and agility merges with creativity to solve your toughest air compressor operating challenges. We listen, we solve, and work until it's right.

Because we're more than a compressor provider. We're your uptime partner.

Part of the Maxx Series

Maxx Air pairs well with the Coats systems they're designed to power – Maxx tire changers and lifts. Your techs now have the compressors that help make tough tasks and manual processes faster and easier. Smart vehicle repair shops gain seamless integration with a single point of service, and standardize technology that keeps your shop in alignment.
